Includes: **Gross Domestic Product (GDP), Income Accounts, Ratios and Indexes, Government Finance Statistics, International Comparisons**

[International Accounts & Overseas Comparisons](#)

Includes: **Balance of Payments (BOP), International Trade in Goods and Services, Goods by commodity, Services, Investment, Merchandise trade, Merchandise trade by selected countries of Association of South-East Asian Nations (ASEAN), Merchandise trade by selected countries of the European Union (EU), Overseas Comparisons**

[Consumption & Investment](#)

Includes: **Consumption, Retail, Capital, Inventories, Motor Vehicle Sales, State Comparisons, Overseas Comparisons**

[Production & Overseas Comparisons](#)

Includes: **Australian and Overseas Products, Livestock Products, Manufacturing, Minerals, Building and Construction, Tourism, State Comparisons**

[Price Indexes](#)

Includes: **Consumer Price Index (CPI), Chain Price Index, Implicit Price Deflators, Commodity Prices, Agricultural Price Indexes, House Price index (HPI), Selected Producer Price Index (PPI), Price Indexes of materials used and**

articles made, Trade Price Indexes, Overseas Comparisons

[Labour Force & Demography](#)

Includes: **Labour Force** status, Unemployment, Employed Persons, Job Vacancies, Industrial Disputes, Estimated Resident Population, Overseas Arrivals and Departures, Overseas Comparisons

[Incomes & Labour Costs](#)

Includes: Household Income, Company Profits, Average Weekly Earnings (AWE), Hourly rates of pay, Labour Costs, Overseas Comparisons

[Finance Markets](#)

Includes: Financial Aggregates, Secured Housing Finance, Personal and Commercial Finance, Key Interest Rates, Exchange Rates, Stock Market (ASX), Credit Market, Overseas Comparisons

[State Comparison](#)

Includes: Summary, Estimated Residential Population, Product and Demand, Consumption and Investment, Building Approvals, Consumer Price Index (CPI), Labour Force, Labour Costs, Housing Finance

[International Comparison](#)

Includes: Gross Domestic Product (GDP), Balance of Payments (BOP), Private Consumption, Fixed Capital, Industrial Production, Price Indexes, Wages, Labour Force, M1 plus quasa-money index

IN THIS ISSUE

Where available, the statistics in this issue are presented as time series for the last three years of annual data, the last nine quarters or 15 months of data. To assist analysis most tables include percentage movements, as well as levels, of series.

Quarterly and monthly data for most series, and annual data for a limited number of series, are available from the Australian Bureau of Statistics for earlier periods than that shown in this publication. Many series can be obtained on electronic media. Inquiries should be directed to the National Information Service on 1300 135 070 or <client.services@abs.gov.au>.

CHANGES IN THIS ISSUE

There are changes to monthly retail trade statistics which are published in tables 3.2, 3.3 and 9.4. Further information on these changes can be found in a feature article in the July 2008 issue of **Retail Trade Trends, Australia, July 2008**, (cat. no. 8501.0).

The May 2008 issue of **Job Vacancies, Australia**, (cat. no. 6354.0) released on 26/6/08 was the final issue for 2008. The Survey of Job Vacancies will not be conducted during 2008-09. The survey may be reinstated in 2009-10. This will effect Tables 6.8 and 9.12.

EXTENDED TIME SERIES

Long time series datacubes for this publication are now provided on the ABS website.

SYMBOLS AND OTHER USAGES

See the Abbreviations section following the Explanatory Notes.

INQUIRIES

For further information about these and related statistics, contact the National Information and Referral Service on 1300 135 070, email client.services@abs.gov.au or Ms Jo Jackson on Canberra (02) 6252 6114, email [<economic.indicators@abs.gov.au>](mailto:economic.indicators@abs.gov.au).

[About this Release](#)

[Expanded Contents](#)

A monthly compendium of economic statistics, presenting comprehensive tables, graphs, commentaries, feature articles and technical notes. Primarily a reference document, the publication provides a broad basis for analysis and research on the Australian economy and includes statistics that can be applied to both macro-economic and sectoral analyses. The publication contains statistics under the following headings: national accounts, international accounts, consumption and investment, production, prices, labour force and demography, incomes and labour costs, financial markets, state comparisons and international comparisons.

EXPLANATORY NOTES

INTRODUCTION

1 Explanatory Notes in the form found in other ABS publications are not included in **Australian Economic Indicators**. Readers are directed to the Explanatory Notes contained in related ABS publications.

2 Australian Economic Indicators presents a statistical summary of the Australian economy, together with international comparisons of selected economic indicators. It also includes commentaries, articles and technical notes. **Australian Economic Indicators** has been developed primarily as a reference document, providing a broad basis for economic analysis and research.

3 The tables contain mainly ABS data, although data from other sources are included. For ABS sourced data, the publication name and catalogue number are included in the footnotes of the tables. If the data are from other sources, the source organisation's name is included in the footnotes.

MOST RECENT DATA

4 The statistics shown are the latest available as at 17 December 2008.

RELATED PUBLICATIONS

5 A list of related publications is included in each chapter under the table of contents. These include publications which are the source of the data in the tables and other related publications.

6 Other useful sources of detailed information are the 'Concepts, Sources and Methods' and classification publications. These are released irregularly, each relating to a specific publication, collection or standard classification. The publications most relevant to Australian Economic Indicators include:

- **Australian and New Zealand Standard Industrial Classification (ANZSIC)**, cat. no. 1292.0
- **Australian System of Government Finance Statistics: Concepts, Sources and Methods 2005**, cat. no. 5514.0
- **Australian National Accounts: Concepts, Sources and Methods**, cat. no. 5216.0
- **Balance of Payments and International Investment Position, Australia: Concepts, Sources and Methods**, cat. no. 5331.0
- **Labour Statistics: Concepts, Sources and Methods**, cat. no. 6102.0.55.001
- **Labour Price Index: Concepts, Sources and Methods**, cat. no. 6351.0.55.001
- **Australian Consumer Price Index: Concepts, Sources and Methods**, cat. no. 6461.0.

SEASONALLY ADJUSTED AND TREND ESTIMATES

7 Series in this publication include original, seasonally adjusted and trend series. Special care should always be taken in interpreting data for the most recent months and quarters. Some of the original and all of the seasonally adjusted and trend series are subject to revision.

8 It is not uncommon for movements in original time series data and those provided from seasonally adjusted and trend series to differ significantly. Movements in a time series of original data may reflect several factors, including:

- longer-term changes in the item being measured (i.e. trend movements)
- short-term irregular changes
- regular seasonal influences
- normal 'trading', 'working' or 'pay' day patterns
- systematic holiday effects.

9 Seasonal adjustment and trend estimates help the user to identify the effect of these influences on the time series. Seasonal adjustment removes the effect of the last three listed influences from the data, leaving only the trend and short-term irregular movements. Trend estimates are then obtained by removing the effects of the short-term irregularities, which in many series can be a major contributor to movements in the original data. By comparing the historical trend series with the seasonally adjusted series, the user can identify the short-term irregularities which have influenced the original series.

10 Trend estimates produced by the ABS are based on Henderson Moving Averages, and are therefore subject to revision especially for the latest few months or quarters.

11 The general methods used in the ABS for making seasonal adjustments are described in Information paper: **An Introductory Course on Time Series Analysis - Electronic Delivery** (cat. no. 1346.0.55.001). The method used to estimate trends is described in Information Paper: **A Guide to Interpreting Time Series - Monitoring Trends** (cat. no. 1349.0).

12 The ABS uses concurrent seasonal adjustment to derive the combined adjustment factors. This means that data from the current month are used in estimating seasonal and trading day factors for the current and previous months. Concurrent adjustment can result in revisions each month to estimates for earlier periods. However, in most instances, the only noticeable revisions will be to the combined adjustment factors for the current month, the previous month and the same month a year ago. As a result of the concurrent seasonal adjustment the trend estimates are also concurrently estimated. Further information on concurrent seasonal adjustment can be found in Information Paper: **Introduction of Concurrent Seasonal Adjustment into the Retail Trade Series, 1999** (cat. no. 8514.0).

CHAIN VOLUME MEASURES

13 The chain volume measures appearing in this publication are annually-reweighted chain Laspeyres indexes referenced to the current price values in a chosen reference year (i.e. the year when the quarterly chain volume measures sum to the current price annual values). Chain Laspeyres volume measures are compiled by linking together (compounding) movements in volumes, calculated using the average prices of the previous financial year, and applying the compounded movements to the current price estimates of the reference year. Quarterly chain volume estimates are benchmarked to annual chain volume estimates, so that the quarterly estimates for a financial year sum to the corresponding annual estimate.

14 Chain volume measures are not generally additive. In other words, in general, component chain volume measures do not sum to a total in the way original current price components do. In order to minimise the impact of this property, the ABS uses the latest base year as the reference year (i.e. the year prior to the latest complete financial year). By adopting this approach, non-additivity does not exist for the quarters following the reference year (currently 2006-07) and is relatively small for the quarters in the reference year and the quarters immediately preceding it. A new base year and the reference year for volume measures are updated annually in the September quarter Australian National Accounts (**Australian Economic Indicators**, January issue). In the September quarter 2008 Australian National Accounts issue, the new reference year became 2006-07 for volume estimates. This had two effects, first, a new base year, 2006-07, was introduced which has resulted in revisions to growth rates in subsequent periods. Second, the volume estimates have been re-referenced to 2006-07 thus preserving additivity in the quarters after the reference year. Re-referencing changes levels but not growth rates, although some revision to recent growth rates can be expected because of the introduction of a more recent base year (and revisions to the current price estimates underlying the chain volume measures).

OTHER USAGES

15 Columns in bold in the tables indicate a total. Columns usually sum from the left, with the total appearing on the right. A major exception is the balance of payments and international investment position data in Chapter 2. These data sum from the right with the total appearing on the left - in keeping with the international standard for these statistics. Some tables include subtotal columns and columns which need to be subtracted to obtain the total. Where this is not clear a footnote explains the relationship between the columns.

16 Columns in italics indicate that seasonally adjusted or trend estimates are not available for that column, and original data are provided instead.

17 Yearly periods shown as, e.g. 2005-06, refer to the fiscal year ended 30 June 2006.

18 Where figures have been rounded, discrepancies may occur between sums of the component items and totals. Percentage changes may not be exactly comparable to tabulated source series due to rounding of the source series, the percentage change series or both.

METRIC PREFIXES

19 Deca (da) = ten
Hecto (h) = hundred
Kilo (k) = thousand
Mega (M) = million
Giga (G) = thousand million
Tera (T) = million million

September	77.9	0.647	3.9	28.0	52.4	15.9	100.7	101.0	101.0

(a) Sales is defined as gross non-farm product plus imports of goods and services less changes in private non-farm inventories.

(b) Corporate gross operating surplus include private corporate trading enterprises plus financial enterprises less imputed bank service charge. TFI = Total factor income.

(c) Interest paid component contains original data.

(d) By convention, zero productivity growth is assumed for industries in the non-market sector, mainly government and some service industries. Therefore, a better indicator of productivity change is provided by the series showing market sector constant price gross product per hour worked.

(a) The estimates for goods and services are not necessarily consistent with the corresponding monthly estimates, shown in tables 2.4 to 2.7 obtained from **International Trade in Good and Services, Australia**, (cat. no. 5368.0) issued monthly, due to data revisions to the original monthly data not feeding into the quarterly original series until the next quarterly release of **Balance of Payments and International Investment Position, Australia**, (cat. no. 5302.0).

(b) In addition to the differences outlined in footnote (a), the quarterly seasonally adjusted estimates for goods and services are not necessarily consistent with corresponding

monthly seasonally adjusted estimates, shown in table 2.4 due to the independent seasonal adjustment of the Quarterly and Monthly data.

na not available

(a) For all time periods, estimates for sugar, sugar preparations and honey are included in Other non-rural.

(b) The estimates for goods and services are not necessarily consistent with the corresponding quarterly estimates, shown in tables 2.1 obtained from **Balance of Payments and International Investment Position, Australia**, (cat. no. 5302.0) due to data revisions to the original monthly data not feeding into the quarterly original series until the next quarterly release of **Balance of Payments and International Investment Position, Australia**, (cat. no. 5302.0).

(c) In addition to the differences outlined in footnote (b), the monthly seasonally adjusted estimates for goods and services are not necessarily consistent with the corresponding quarterly seasonally adjusted estimates, shown in table 2.1 obtained from **Balance of Payments and International Investment Position, Australia**, (cat. no. 5302.0), because of the independent seasonal adjustment of the monthly and quarterly data.

(a) The estimates for goods and services are not necessarily consistent with the corresponding quarterly estimates, shown in tables 2.1 obtained from **Balance of Payments and International Investment Position, Australia**, (cat. no. 5302.0) due to data revisions to the original monthly data not feeding into the quarterly original series until the next quarterly release of **Balance of Payments and International Investment Position, Australia**, (cat. no. 5302.0).

(b) Includes Consumption goods n.e.s. and Household electrical items.

(c) ADP, Automated Data Processing.

(d) Includes Capital goods n.e.s.; Telecommunications equipment and Civic aircraft.

(e) Includes Other merchandise goods; Food and beverages, mainly for industry; Primary industrial supplies n.e.s.; Paper and paperboard; and Iron and steel.

(f) Includes Goods for processing; Repairs on goods; Goods procured in ports by carriers; and Non-monetary old.

June	-6.2	20.7	-22.5	-4.3	7.3	54.3	-8.7	-12.0
2008-2009								
September	-5.5	22.5	-23.7	-4.3	4.6	58.1	-7.7	-10.9

(a) Derived from current price original data. The net international investment position ratios are derived from the net foreign liabilities at the end of the period and Gross Domestic Product for the year ended with that period. Other ratios use only data for the year ended with the period shown.

(b) For the latest reference period, GDP for the year ended with the previous quarter is used.

(a) The exports data presented in this table differ from those in Tables 2.1 to 2.5 because they are recorded on an international trade basis rather than a balance of payments basis and are compiled from a different edition of the data.

(b) The ten member nations of ASEAN are Brunei, Cambodia, Indonesia, Laos, Malaysia, Myanmar, Philippines, Singapore, Thailand and Viet Nam.

(c) The twenty seven member states of the EU are Austria, Belgium, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Republic of Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Poland, Portugal, Slovak Republic, Slovenia, Spain, Sweden, and the United Kingdom. Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovak Republic and Slovenia are included from July 2004. Bulgaria and Romania are included from August 2007.

September	1	-984	-2 548	-947	372	-414	-198	-6 403

(a) The exports and imports data presented in this table differ from those in tables 2.1 to 2.5 because they are recorded by a foreign trade basis rather than a balance of payments basis and are compiled from a different edition of the data.

(b) The twenty seven member states of the EU are Austria, Belgium, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Republic of Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Poland, Portugal, Slovak Republic, Slovenia, Spain, Sweden, and the United Kingdom. Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovak Republic and Slovenia are included from July 2004. Bulgaria and Romania are included from August 2007.

(a) Original sales data are provided by the Federal Chamber of Automotive Industries and sourced from VFACTS.

(b) Extreme care should be exercised in using the seasonally adjusted series for the number of new motor vehicles sales in Tasmania, the Northern Territory and the Australian Capital Territory. The highly erratic nature of this data makes reliable estimation of the seasonal pattern very difficult.

2006-2007						
September	1 029	1 041	98.9	100.5	100.1	98.7
December	1 047	1 052	98.5	98.9	99.6	98.9
March	1 057	1 056	100.3	99.9	100.1	100.4

June	1 080	1 071	102.3	100.7	100.2	101.9
2007-2008						
September	1 089	1 071	103.0	101.0	100.4	102.4
December	1 094	1 065	100.9	98.0	99.4	102.0
March	1 103	1 064	104.3	99.7	100.2	104.9
June	1 122	1 074	106.6	98.6	97.9	106.1
2008-2009						
September	1 141	1 080	108.8	98.3	97.4	108.2

(a) Average non-farm wages, salaries and supplements per wage and salary earner. Seasonally adjusted data.

(b) Base for index: 2006-07 = 100.0.

(c) Deflated by the Gross National Expenditure deflator.

(d) Non-farm wages, salaries and supplements, plus payroll tax less employment subsidies plus fringe benefits tax per hours worked by non-farm wage and salary earners.

(e) Ratio of derived private non-farm corporate wages, salaries and supplements plus payroll tax less employment subsidies, plus fringe benefits tax paid by the private non-farm corporate sector to derived private non-farm corporate sector gross product at factor cost plus payroll tax less employment subsidies plus fringe benefits tax.

(f) Nominal unit labour costs (see footnote (g) deflated by the derived implicit price deflator for gross non-farm product.

(g) Ratio of nominal hourly labour costs to average hourly labour productivity (real gross non-farm product per hour worked by all employed persons).

na not available

(a) Excludes Commonwealth and State Government and interbank deposits but includes deposits of the non-bank sector with the Reserve Bank.

(b) Currency plus bank deposits (including certificate of deposit with trading banks) of the private non-bank sector.

(c) Borrowings (other than from banks and related corporations) by permanent building societies, credit co-operatives, finance companies, authorised money market dealers, pastoral finance companies, money market corporations, general financiers and cash management trusts; less borrowings by authorised money market dealers from those non-bank intermediaries. Breaks occur from time to time due to changes in number of reporting corporations.

(d) M3 plus borrowing from private sector by non-bank financial intermediaries less the latter's holding of currency and bank deposits.

(e) Holdings of notes and coin by private sector, plus deposits of banks with the Reserve Bank and Reserve Bank Liabilities to the private non-bank sector.

(f) Loans and advances of those financial intermediaries whose deposit liabilities are included in broad money.

(g) Bills outstanding under acceptance and endorsement commitments by banks.

(h) Credit is equal to bank bills outstanding plus loans and advances by financial intermediaries whose liabilities are included in broad money.

(a) All data are end of period unless otherwise specified.

(b) Data are an average of the assessed daily market yields for the week ended the last Wednesday of the month.

(c) The interbank cash rate is the interest rate which banks pay or charge to borrow funds from or lend funds to other banks on an overnight unsecured basis.

(d) Standard variable rate loans of large bank housing lenders.

	October	-16.0	-10.7	-9.2	-20.9	-13.8	-13.6

(a) Rates are period average exchange rates.

(b) On January 1, 1999 eleven European Union nations launched the Euro, a single currency giving control of interest rate and exchange rate policy to the European Central Bank. The Euro was immediately available for electronic financial and business transactions, but Euro coins and notes were not issued to the general public until January 2002. The participating nations are Austria, Belgium, Finland, France, Germany, Ireland, Italy, Luxembourg, the Netherlands, Portugal and Spain. Greece adopted the Euro on 1 January 2001 and Britain, Denmark and Sweden chose not to adopt the Euro.

(c) May 1970 = 100.0

September Quarter 2008 (Q)	1.1	1.1	1.5	1.1	1.3	1.4	0.8	1.3	1.2

(a) The latest quarterly estimate of Australian resident population is shown in Table 9.2. This estimation has been used to calculate ratios for subsequent periods.

(b) Extreme care should be exercised in using the seasonally adjusted series for Private new capital expenditure for Northern Territory and the Australian Capital Territory. The highly erratic nature of this data makes reliable estimation of the seasonal pattern very difficult.

2008-2009

October	-1.3	-1.8	-1.8	-0.8	-0.7	-2.3	-1.2	-1.4	-1.4
---------	------	------	------	------	------	------	------	------	-------------

(a) Original sales data are provided by the Federal Chamber of Automotive Industries and sourced from VFACTS.

(b) Extreme care should be exercised in using the seasonally adjusted series for the number of new motor vehicles sales in Tasmania, the Northern Territory and the Australian Capital Territory. The highly erratic nature of this data makes reliable estimation of the seasonal pattern very difficult.

Source: **Sales of New Motor Vehicles, (Electronic Publication)**, (cat. no. 9314.0.55.001)
